SEASON 1922

Fruit and Shade Trees

Shrubs, Plants and Vines

Nurseries Located on the Depot Road $\frac{1}{2}$ South Pennsylvania Depot
OHIO STATE PHONE 83

Salem : : Ohio

INTRODUCTION

We are glad to have you give your attention for a few minutes to our catalogue, believing you will find much information that is profitable as well as interesting, whether you have made up your mind to plant any new stock this year or not.

The conditions of the world's markets are more favorable than even before for the Fruit Grower, and the general slump in prices of Agricultural products other than Fruits has fully justified the foresight of those who have planted Fruit trees, plants, and vines, in place of devoting all their time to grain farming. While the demand for grains may depend upon the financial resources of Europe, or the condition of the crops in South America or Australia, the welfare of the Fruit Grower depends upon his ability to supply an increasing demand for his products right at his door, and without competition with other countries or conditions. The days of big and quick money in farming have been succeeded by the necessity of having a moderate amount of many things to sell, and the most profitable of these is fruit.

It is no longer a distinction to own a fine automobile, but it is a distinction to have a well planted home. We call especial attention to our fine line of Shrubbery, as the financial value of planting Shrubbery and Ornamentals has amply proven that those residences which were well planted have been sold at a handsome price over the plain buildings, and we feel more free than ever to urge the planting of well arranged grounds for both profit and pleasure.

We are always glad to consult with prospective customers and give them what assistance we can in all their planting problems, whether for the orchards or the beautifying of the home, based upon practical knowledge of what others have found to be most satisfactory under similar circumstances. If you cannot call at our nursery and talk the matter over personally, any communication on the subject will receive our best attention.

This knowledge of local conditions and results in this part of Ohio is one of the strongest claims we have for your patronage. You can send your orders to the four corners of the earth, but you will nowhere receive the service based upon exact knowledge that we can give you, the freedom from loss of stock long on the road and the loss of vitality because it has been long dug and often handled, and we trust you will consult us before placing your orders elsewhere.

In the Nursery trade there has grown up a standard of ethics which is observed by all reputable nurserymen, and you are respectfully referred to these terms and conditions when placing your orders:

THE SHIPPING SEASON generally begins from the first to the middle of April in the spring, and about the 15th of October in the autumn. The season is not regulated by any definite date, however, nor by the state of vegetation at the locality of the planter, but by the condition of the stock at the nursery. Parties living south of us may receive our trees some weeks after their season has opened, yet when planted will give entire satisfaction.

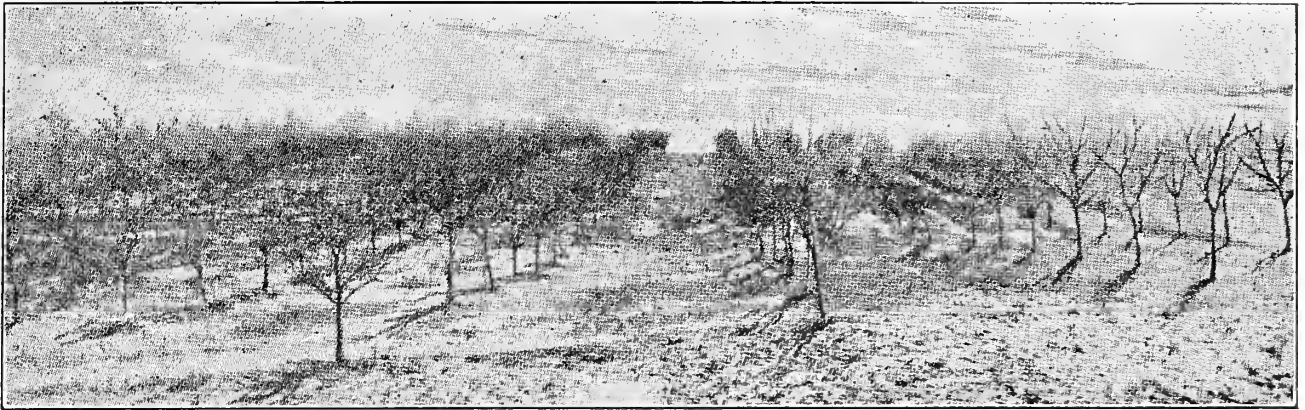

EARLY ORDERS—To one familiar with the rush at the packing season, it must be obvious that it is impossible to fill an order requiring much time in its preparation on short notice without doing an injustice to others who have their orders previously booked. In fairness to all, we have adopted the practice of filling orders in the rotation received, unless orders are received far enough ahead of the packing season, with instructions to ship at a given date, so that we can arrange a special shipping date. So we again say—place your orders as far in advance of shipping as you possibly can, stating when you would like stock sent.

PACKING FREE—We have arranged to pack all orders free of charge and deliver same to transportation company at which time our responsibility ceases. All claims for damage because of delay in transit must be presented to the railroad companies.

OUR GUARANTEE—We use great care to have our stock genuine and true to label, all orders are accepted with the express understanding and agreement with the purchaser, that should any stock prove not true to label, we hold ourselves ready upon proper proof to refund the money paid for it, or will replace with other stock, but shall not be liable to damages other than herein named.

Certificate of Nursery Inspection Furnished With all Shipments.

Apples, The King of Fruits

Summer Varieties

Early Harvest—Medium to large size, almost round, bright yellow skin, of good quality and a good bearer.

Red Astrachan—Large and a great bearer; deep crimson; rather sour but fine for cooking.

Sweet Bough—Fine size and very sweet; is a good bearer; pale yellow ripens in August.

Yellow Transparent—The earliest apple; pale lemon color. Bears very young, quality good, skin very smooth.

Fall Varieties

Chenango Strawberry—Fruit oblong shaped and flesh of fine quality, yellow, striped with red, good bearer and fine for eating.

Common Rambo—Medium size; the very best quality, good bearer, fine for eating, streaked with red on sunny side.

Duchess—Very hardy; a great bearer, good size, flesh tender and juicy; skin streaked with red and yellow.

Fall Pippin—Very large; skin yellow, good quality; valuable for cooking and market.

Gravenstein—Large size, yellow with red stripes, flat in shape, flesh tender, crisp and highly flavored.

Maiden Blush—Large, flat, pale yellow with a red cheek; very beautiful, a good bearer.

Ohio Nonpareil—Of largest size and the top notch in quality; brings highest market price on account of its beautiful red color, very hardy and valuable.

Red Beitingheimer—Very large, pale green covered with purplish-crimson

stripes, hardy, a good grower and abundant bearer.

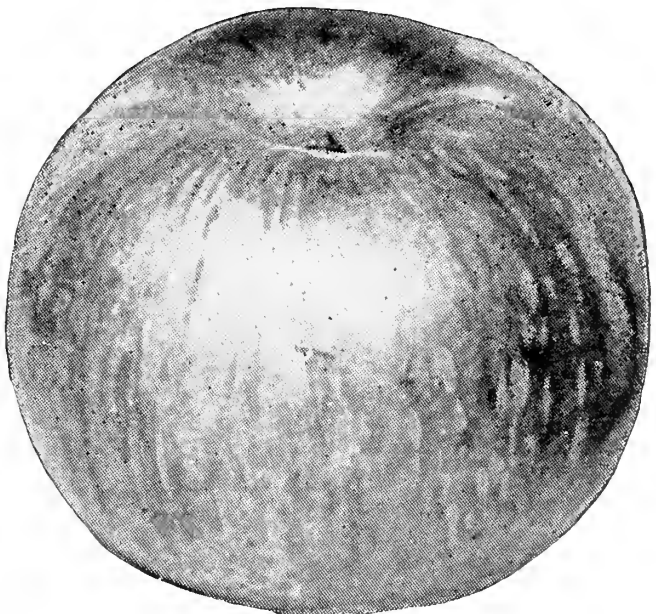

Smokehouse—Tree hardy and a good bearer, flesh tender and spicy and cooks well; very desirable.

Sweet Winesap—Fruit of good size bright red, good for baking, dessert or apple butter, tree a good bearer; fruit will keep till the holidays.

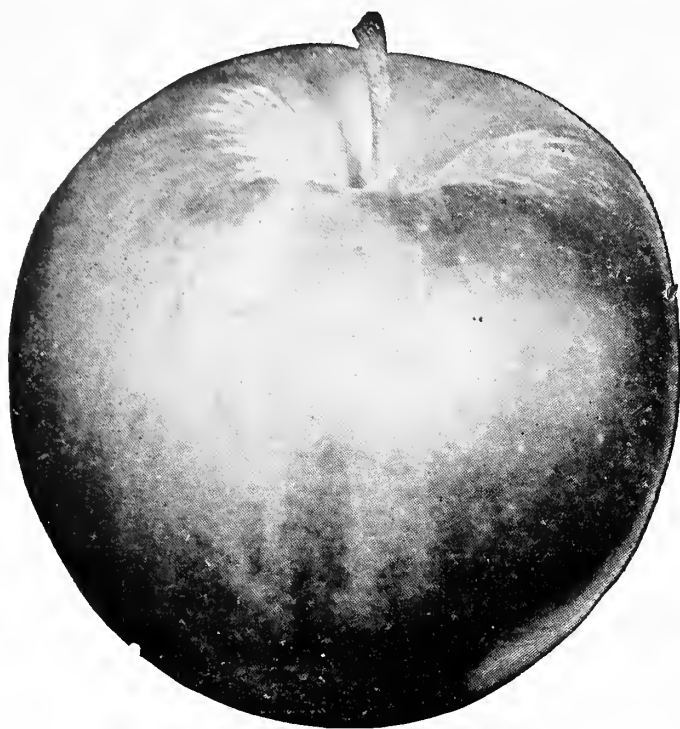

Winter Varieties

Banana—Good bearer; fruit perfect in form, skin golden yellow, good keeper, flesh tender and aromatic, good for dessert.

Baldwin—The old standard. When planted in good rich soil and is properly pruned and sprayed, it has no superior for profit. Fine both for eating and cooking, fruit large, bright red, crisp and juicy. If in doubt what to plant, select Baldwin.

Sweet Winesap

Staymans Winesap

Ben Davis—A great bearer, tree extremely hardy, quality fair, good keeper. This apple has not many friends but it is a money maker on account of its fine color.

Black Ben Davis—Very large; extremely dark red, better in quality than the Ben Davis and a decided improvement.

Bentley—Medium size; a great bearer will keep the year round in good condition. Color light red, flesh rather sweet but will cook.

Blue Rambo—Very large and great bearer, light blue cast over red stripes, juicy and good.

Delicious—Light red in color, heavy bearer, flesh fine grained, juicy with a delightful aroma, must have good ground and culture or it will be undersize here.

Fallawater—(Waldour) Large to very large with smooth skin, yellow, medium quality, a great bearer.

Fameuse or Snow—Fine for dessert, of medium size, striped red; flesh snowy white, delightful flavor.

Flushing Spitzenberg—Great bearer, good size, rather flat in shape, striped red and good quality.

Gate—Color yellow with oily skin; quality most excellent, a good bearer but tree is rather short lived.

Golden Russet—Medium size; round, clear, gold russet with slight blush; very hardy, flesh tender, crisp and juicy.

Grimes Golden—Medium to large size; beautiful golden color, highest quality, good bearer.

Hubbardston Nonsuch—Large size, skin yellow mottled with red; flesh tender, crisp and best quality, a heavy and regular bearer. Oct. to Jan.

Jonathan—Fine size and most beautiful appearance, pale yellow heavily flushed with red. Profitable for a market sort; very productive, flesh rich and juicy.

King—Fruit very large, fine shape and color. Flesh crisp and tender of good quality, very attractive.

Mark Sweet—Medium size, dark red, very sweet, good bearer and a good winter sweet apple.

McIntosh—Medium size; very dark red, making fine appearance, one of the most beautiful apples; good quality.

Mammoth Black Twig—Very dark red and showy; tree hardy and good bearer. Much like the old Winesap.

Northern Spy—This apple has no superior for beauty and quality; a little late in beginning to bear, but is productive after it starts. Very large, striped red next to sun, profitable.

Rhode Island Greening—A popular market sort from its large size and fine quality; beautiful yellow when ripe, very productive.

Roman Stem—Medium size, yellow skin, good quality, very hardy and productive.

Rome Beauty—Now being largely planted as a leading market apple; large size, quality excellent, heavy and sure bearer, bright red all over, all combined make it a winner.

Jonathan

Roxbury Russet—An old variety and believed to be the best of the Russet type. Large size, good quality and keeps well.

Seek-No-Further—Medium size, skin yellow with bright red stripes and russet dots, good bearer and is an excellent apple for home use.

Stark—A heavy, sure bearer; fruit large, golden green with red stripes on sunny side; flesh yellow, mild sub-acid.

Stayman Winesap—Now rated as the leading commercial apple, bears young, fine size, yellow skin beautifully covered with stripes of red and carmine, good keeper, flesh crisp juicy and best quality.

Talman Sweet—Very sweet, medium size, color pale yellow, tree vigorous and productive.

Wagner—Good size, beautiful appearance, bears young, flesh firm and good quality.

Willow Twig—Color dull red, long keeper, flesh yellow and firm, good size and heavy bearer.

Wolf River—Very large, yellow with highly colored red cheeks; flesh white, spicy flavor; tree hardy and productive.

Wealthy—Fruit large, roundish and deep red, an early winter sort, valuable for its fine appearance and good quality. Very hardy; tree productive.

York Imperial — Very productive and hardy, fruit fine size, smooth skin, yellow flushed with red giving it an attractive appearance; good quality, tree bears young.

Dwarf Apples

These trees are budded on Doucine stock and grow to 8 to 10 feet in height, bearing very young and fruit of finest appearance. We have the following varieties; Red Astrachan, Banana, Wealthy, Baldwin, Rome Beauty, Transparent, Delicious, Wagner, Spy, Stayman, Smokehouse and Jonathan.

Crab Apples

Hyslop—Beautiful crimson, good size, great bearer, used for cider and jelly.

Transcendent—Beautiful yellow skin, very large, bears young, makes the finest cider and will cook.

Peaches for Profit

Yellow Varieties

Admiral Dewey—Medium size, yellow peach; good bearer, very early and good. July.

Crosby—Medium size; flesh yellow and fine quality; heavy bearer, very hardy. September.

Elberta—Without question this is the leading commercial peach; very large, handsome, bright yellow; flesh juicy and so firm that it stands shipping well; hardy and productive. September 15.

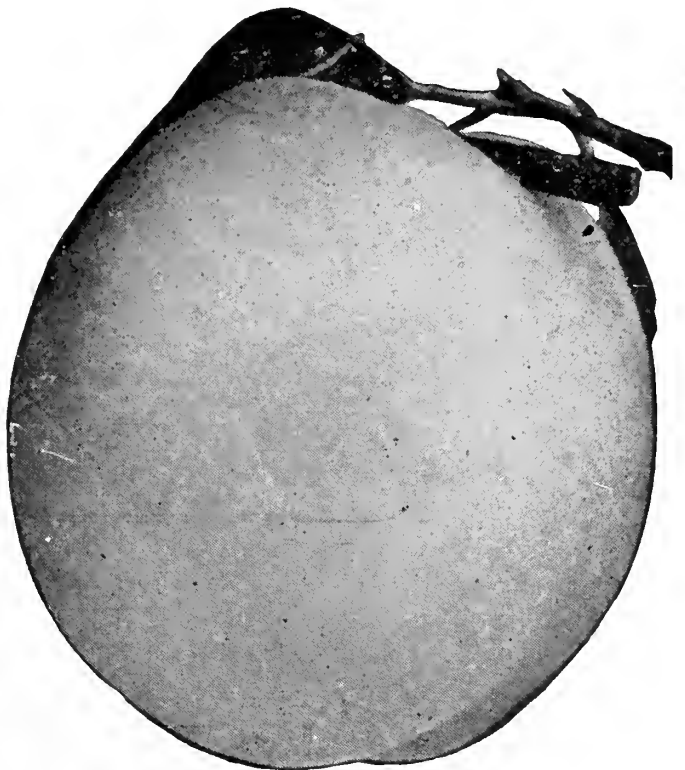

Early Crawford—Much like Late Crawford in size and color; very good quality; ripens about September 1.

Golden Drop — Bright golden; very hardy, good bearer, best quality. September 15.

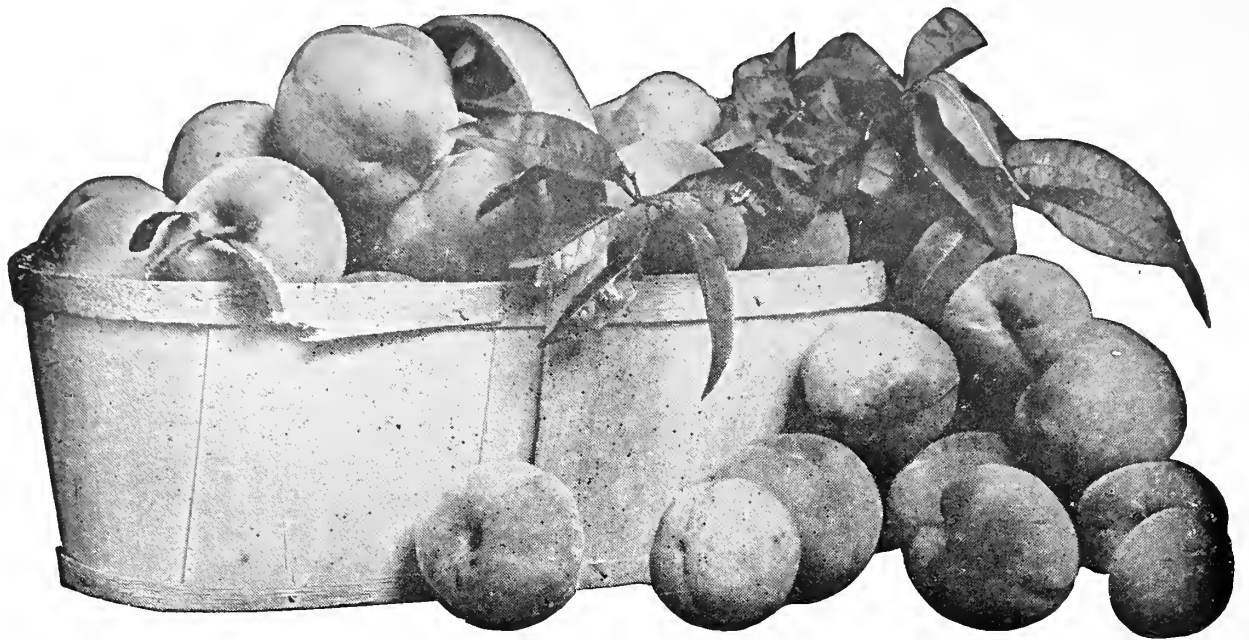

Hale—Very large, excellent quality, most beautiful color but seems to be a rather shy bearer.

Lemon Free—Very hardy; a heavy bearer, the highest quality; lemon shape and color, best peach for home use. Late September.

Late Crawford—Largest size; fine appearance; bears well; valuable market variety. September.

Lemon Free

Lemon Cling—Very large; sweet, used for spicing; productive. September.

Niagara—A New York variety, ripening just after Elberta; has been well tested and found valuable; good quality, large size; productive. Late September.

Kalamazoo — Large, golden yellow; small seed, good quality, productive. September.

Salway—Our latest peach; very large, creamy yellow with red cheek; flesh deep, rich and sweet, productive. October.

Smock—A fine, large variety valuable as market sort, very productive, flesh rich and juicy, fine for canning. Late September.

Sweet October—Very large, extremely late; most excellent quality and good bearer.

Wilma—Said to be very large, of best quality and a great cropper, ripens late.

Yellow St. John—Fruit almost round and good size, bright yellow skin, ripens August 20.

White Varieties

Belle of Georgia—Very large; skin white with beautiful red cheek; productive. July.

Carman—An immense cropper ; very beautiful red cheek; large, white with skin very tough, flesh juicy of the best quality; tree hardy, a good market sort. Early August.

Champion — Of the finest appearance; fruit very large and delicious; comes in after Carman; productive; valuable. August 20.

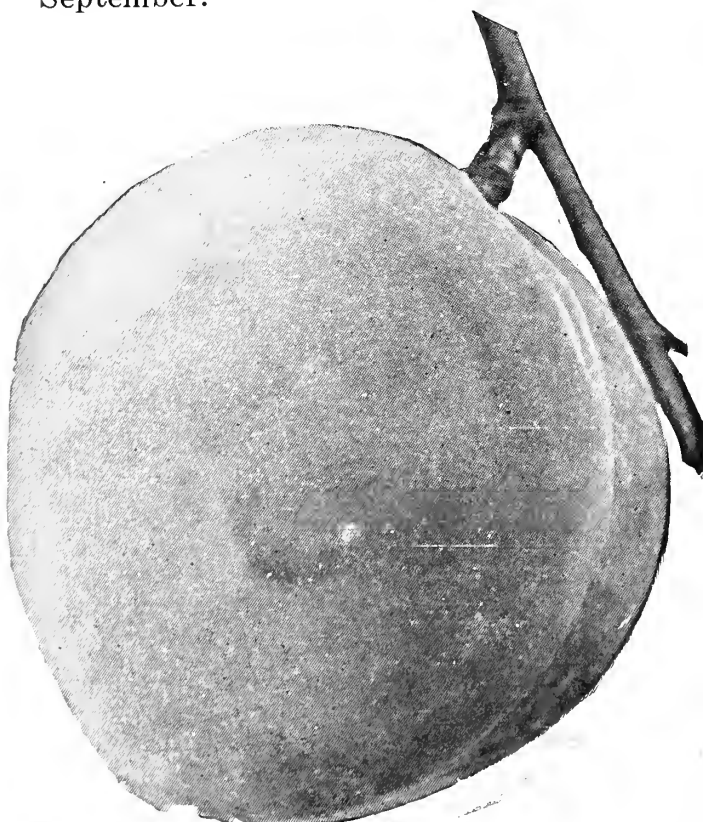

Heath Cling—Large; creamy white very sweet; valuable for spicing. October.

Mixon—Large; great bearer; extremely hardy, flesh tender and juicy. September.

Mt. Rose—One of the best early freestones; medium size, flesh rich and delightful, hardy. Productive. August.

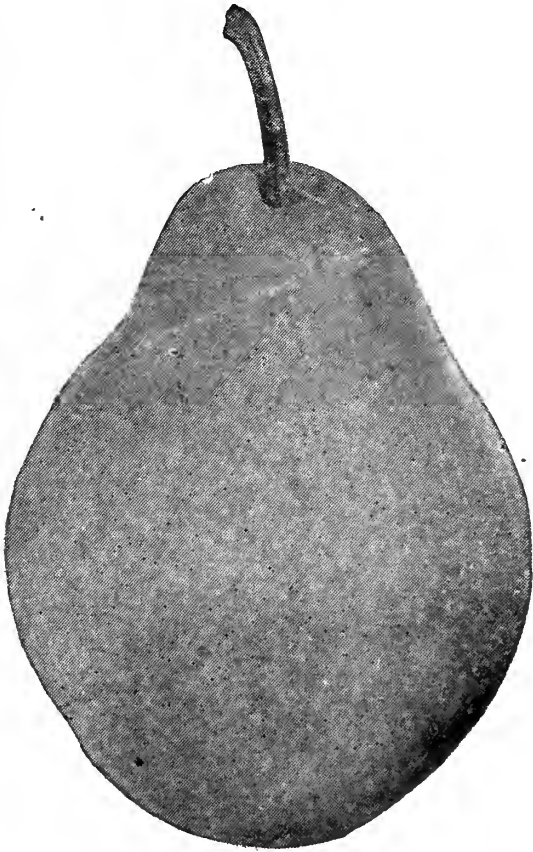

Stump—A most beautiful peach; large, red and white skin; flesh rich and juicy, good cropper; tree hardy. Late September.

Troth's Early—Medium size; ripens early and almost freestone; very sweet, productive. August 1.

Salway

Delicious Pears

Bartlett

Bartlett—Large; bright yellow with red blush; juicy and highly flavored; productive. September.

B. D. Anjou—Large; greenish color very hardy and productive; juicy, rich vinous. October.

Bell—An old variety, very early, fine color, good bearer; tree hardy, fair quality.

Bosc—Very large, long shaped, russet color, late fall or early winter season, best quality and productive.

Clairgeau—Extremely large size, tree bears young; skin yellow shaded with crimson, flesh juicy and excellent. Ripens in September.

Clapp's Favorite—Very large; long shaped; beautiful blush next to sun; of good quality; should be picked green and allowed to ripen in a cool place. August.

Duchess—The largest pear; greenish yellow and good quality; succeeds better when grown as a dwarf. October.

Flemish Beauty—Very sweet; productive and hardy; large and fine. September.

Kieffer—An immense cropper and very hardy, fine color when ripened properly; a great market variety. October to January.

Koonce—Medium size, yellow with red cheek, very fine, a good early pear.

Lawrence—Medium size; bright golden yellow, productive and hardy; will keep all winter.

Sheldon—Russet color; quite large; round and most excellent flavor, hardy and productive. September.

Seckel—A little pear of the best quality; great bearer and hardy, best eating pear. September.

Vermont Beauty—Nearly round in form, yellow covered with red, most excellent quality, hardy and productive.

Wilder—Medium size, but a good bearer, and excellent flavor, good grower, fine color, early.

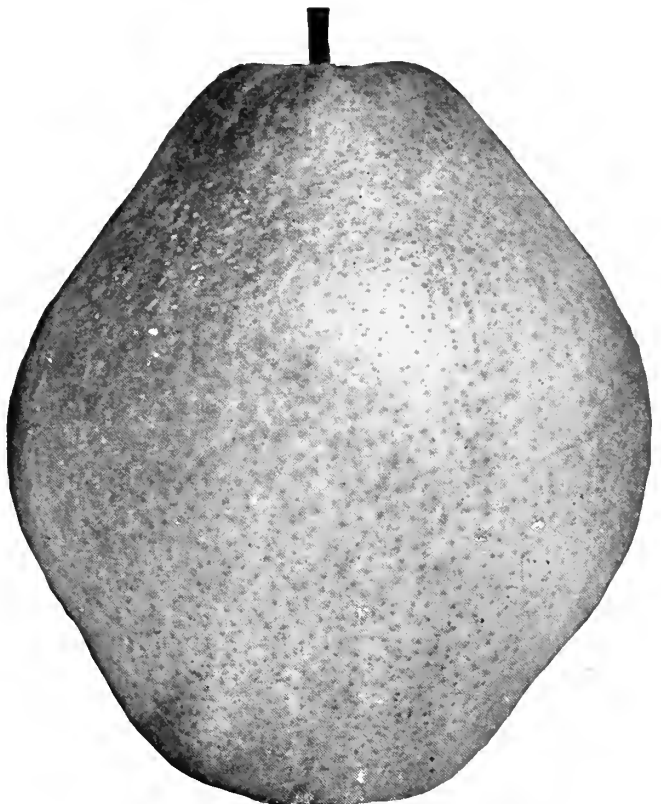

Winter Nellis—Medium size, very sweet and juicy, will keep into the winter, hardy and productive.

Worden Seckel—Larger and later than Seckel, said to be superior in quality, a heavy bearer and very hardy.

Dwarf Pears

Bartlett **Duchess** **Kieffer**
Clapp's Favorite **Flemish Beauty**

Dwarf pear trees can be planted where there is not much room, as they make only a small, round top and come into bearing at once, generally the second year after planting.

Kieffer

Profitable Plums

Abundance—Japan variety of fair to large size, cherry red with white bloom; flesh yellow, clings to the seed, a rapid grower and bears young. Ripens last of July.

Bradshaw—Very large; dark red, flesh green, productive, sells well in market. August.

Burbank—A Japanese variety, great bearer, fruit large if thinned out, cherry red in color, flesh yellow and firm, and fair quality.

Fellenberg (Italian Prune)—Very large and purple; ripens in September; used for drying.

German Prune—The great market sort; sells for highest price, large purple with thick blue bloom, hardy and productive. September.

Imperial Gage—Good size; light green in color, sweet and juicy, productive August 10.

Lombard—Very reliable and a sure bearer; fruit medium to large, dark red, pleasant flavor, thrives almost anywhere. August 20.

Monarch—Very large, dark blue with green flesh which parts from the seed when ripe; good bearer, ripens late.

Pond Seedling—Extremely large, bright red, very showy, ripens late, flesh rather coarse but is good for canning.

Lombard

Shropshire Damson—Very productive; the largest of the Damsons, always sells well in market; tree rather slow grower in nursery, fruit produced in clusters. Ripens late. October.

Shippers Pride—Very large; dark purple, flesh is sweet and firm, stands shipping well. September.

Wild Goose—Ripens very early, light red in color, flesh yellow, juicy and sweet; slings to the seed.

York State Prune—Extremely large; dark blue, prune shaped, a good bearer and fine for market. September.

Yellow Egg—Skin yellow with white dots, flesh solid and rather coarse, not so good for eating but excels for cooking or canning.

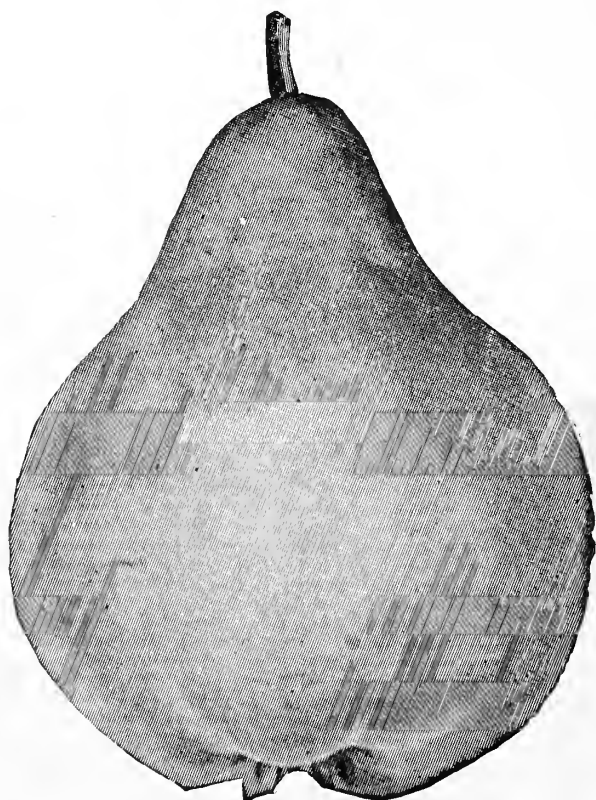

Quinces For Flavoring

Bourgeat—Very large; round, golden color, small core, very productive and will keep well.

Champion—Ripens late; very large; bears young, good cropper.

Orange—One of the largest; productive, hardy; bright golden yellow, fine; flesh firm and good flavor. Early Oct.

Reas Mammoth—Supposed to be a seedling of the Orange, larger in size, excellent.

Champion

Cherries For Market

Black Tartarian

SWEET VARIETIES

Bing—Is well recommended as a cherry of large size, delicious flavor; color is almost black, very solid meat; ripens late.

Gov. Wood—A most prolific bearer fruit is large, round, color yellow mottled with red, very hardy and profitable.

Lambert—Extremely large turning jet black when ripe, tree a good grower hardy and productive.

Napoleon (Royal Ann)—Fruit large, very solid, pale yellow when ripe. Late.

Rockport Bigarreau—Large, light red, erect grower, very sweet and juicy, good bearer, early.

Schmidt—Fruit in large clusters, color jet black, large size, sweet and juicy. July. Hardy and productive.

Sidney—Originated from a chance seedling in this country, is a beautiful red, very large size and abundant bearer. The only red sweet cherry that is really valuable that we know of. The original tree has produced 14 bu. of fine cherries in one season, does not rot easily, ripens last of June.

Tartarian—An old variety that is still popular; cherries of the largest size, black in color, ripens late.

Windsor—Fruit large, liver colored, flesh firm and good quality, tree hardy and productive.

Yellow Spanish—Large, pale yellow, flesh solid, sweet and juicy, tree vigorous and productive. June.

SOUR VARIETIES

Baldwin—Fruit large, dark red and ex-

cellent quality, not as sour as other of the Morello type. Ripens early and tree is very good bearer.

Dyehouse—The earliest cherry is a great bearer; the color is bright scarlet, very small seed, excellent for canning.

Early Richmond—The standard for productiveness and hardiness, fruit is a dark red, large, best for pie cherry, tree very hardy and productive.

English Morello—Good size, long shaped, dark red when ripe, flesh solid rich and juicy, late.

May Duke—Large, dark red, juicy and very rich pulp, tree a great bearer, ripens early.

Montmorency—Very large, bright red, ripens late, when other cherries are scarce; hardy and profitable.

Olivet—Large, deep red in color, great bearer, juice rich and vinous with sweet flavor ripens late June.

Reine Hortense—Very large; color is bright red, mild flavor, tree good grower and productive. Late.

Wragg—Resembles English Morello, but said to be hardier in bud, flesh very firm; ripens late.

COMPASS CHERRY PLUM

Compass Cherry-Plum — A cross between the Minor Plum and the Sand Cherry. Fruit some larger than an ordinary cherry, almost purple in color with a tinge of red, flesh yellow and good and fruit can be used for eating or cooking, tree seems hardy and productive, but is recommended more for home use than a profitable market fruit.

Montmorency

Grapes Thrive Everywhere

Agawam—Very large; dark red, sweet, early.

Brighton—Large bunch. bright red, very sweet.

Campbell's Early — Very large, jet black, sweet and productive. Early.

Catawba—Very large; coppery red, the best wine grape.

Concord—Fine size, black, succeeds everywhere.

Delaware—Small fruit but fine vinous flavor; slow grower.

Eaton—Very large both in fruit and bunch, very productive, pulp tender and juicy.

Green Mountain—Very early, medium size, thin skin but superb quality.

Moore's Early—Very large, black ripens early.

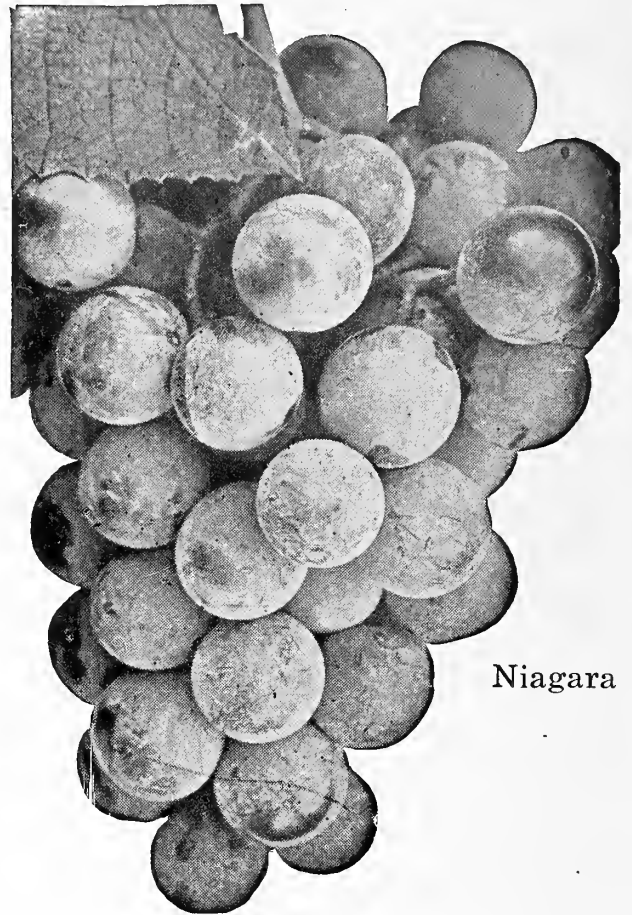

Niagara—Large bunches; color white; excellent quality.

Salem—Large; bright red; juicy and sweet; Late.

Wyoming—Large; bright red; is very sweet. Early.

Pocklington—Large; is golden yellow; late; keeps well.

Worden—Resembles Concord except it is a week earlier.

Niagara

Fay's Prolific—Bunches large; very productive; red.

Perfection—Bright red in color, large size and best quality.

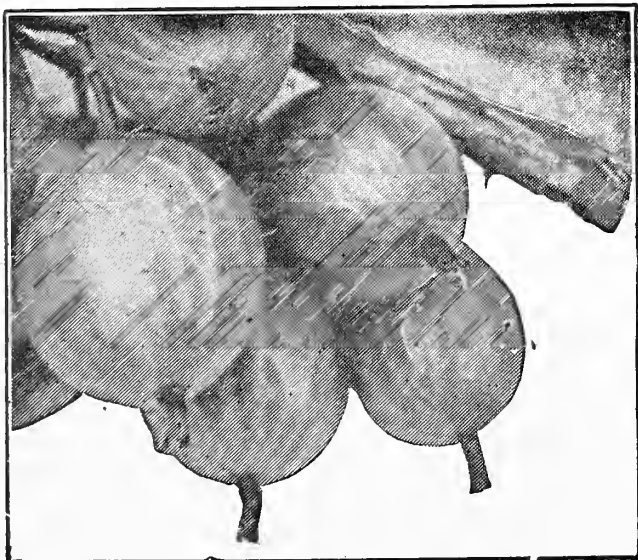

White Grape—The best white currant. Mild flavor.

Wilder—Bright red with large bunches a good grower and producer.

Currants

Black Naples—Is very productive large bunch, the best black currant.

Cherry—Berries very large; requires good soil, red.

Columbus

Gooseberries

Chautauqua — Very large, beautiful light yellow, very sweet and fine.

Columbus—Very large, greenish yellow, good market variety.

Downing—Pale green; sweet, fair size.

Pearl—Medium, greenish, very sweet productive.

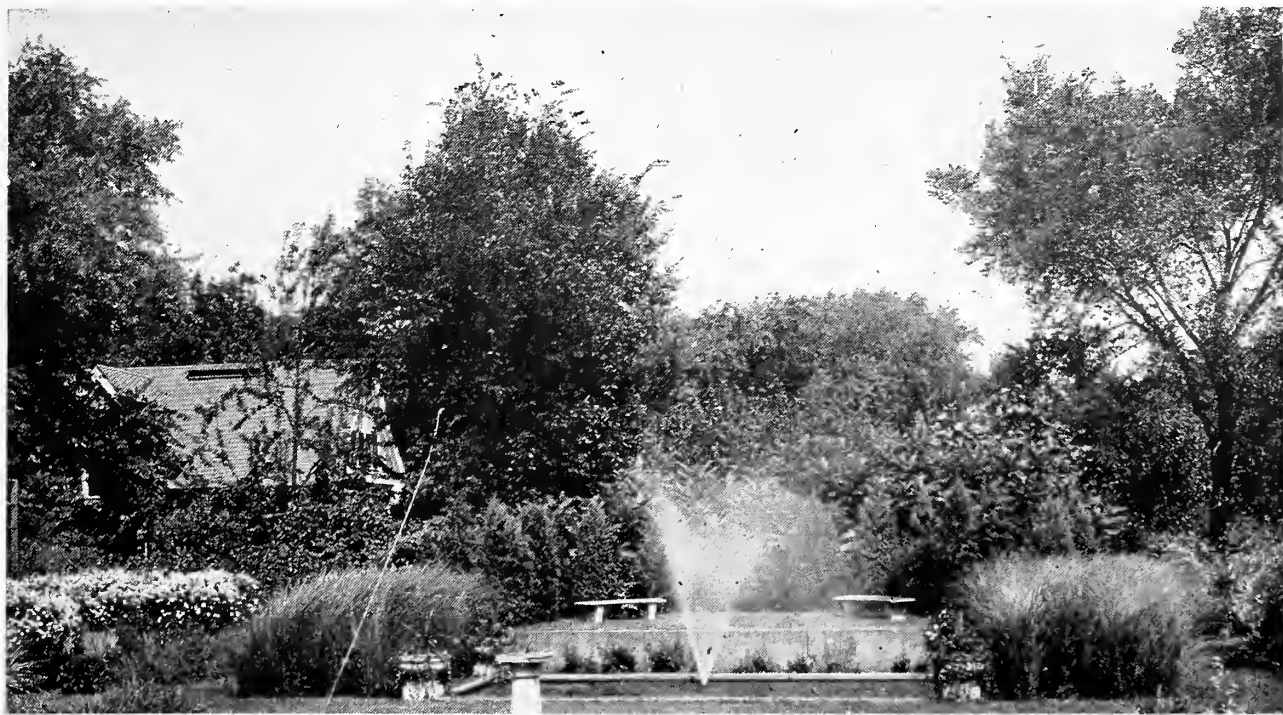

Poorman—Very large, red when ripe, strong grower and productive.

Red Jacket—Large, free from mildew, productive.

Apricots

Early Golden—Medium size, nearly round, skin smooth, flesh yellow, juicy and sweet, hardy and productive.

Moorpark—Fruit large yellow with numerous dots, flesh sweet and rich, productive.

Deciduous Shade Trees

American Elm—Grows to 100 feet tall; has a wide, open top, excellent for avenues where it succeeds well.

American Linden—A stately tree growing to 60 feet high; valuable both as an ornamental and for its wood, makes a fine appearance.

Bechtel's Double Flowering Crab—A small, bushy tree, valuable for its flowers produced in great abundance and very fragrant.

European Mt. Ash—A rapid growing tree, growing large with spreading habit, darker foliage than the American Ash, and has a good ornamental effect.

Norway Maple—Forms a compact, round head, of a fairly rapid growth; to 40 feet high; valuable for lawn or park.

Silver Maple—The most rapid growing of all shade trees; foliage bright green and grows to a large size; very hardy.

Thorn, Paul's Flowering—A small quick growing tree producing masses of most beautiful double crimson flowers in May, followed by large red berries in later summer.

Weir's Cut Leaf Maple—Delicately cut leaves and long, half drooping branches cause an unique appearance; a rapid grower, becoming very large and spreading.

Oriental Plane—A graceful, wide-spreading tree, grows rapidly to 80 feet tall; large, leathery leaves, turning yellow in the fall.

Catalpa Speciosa—Makes a rapid growth; large leaves, grows to a large size, being planted for posts.

Purple Beech—A medium size tree, excellent for lawn decoration. Leaves are very showy, deep purple in the spring, changing to dark green in the fall.

Horse Chestnut (Buckeye Tree)—A handsome tree for lawn or street planting, produces long spikes of white flowers; very hardy and a good grower.

Pin Oak—Leaves are deep green and glossy, turning to gold in the fall, growing faster than other oaks and makes a beautiful tree.

Prunus Pissardi—Purple leaved plum, distinct little tree and very showy, covered with leaves that deepen in color to the end of the year.

Dogwood (Cornus Florida)—Produces white flowers very early in the spring, followed by bright red berries in the fall, foliage green and glossy during the summer but turns to dark red late in the fall, bark red, makes an ornamental tree hard to beat.

Weeping Varieties

Babylonica Willow—This tree has long slender olive green branches, drooping habit and grows quickly, does best in damp ground.

Wisconsin Weeping Willow—A large and rapid growing tree, very hardy, branches long and drooping.

Camperdown Elm—Long, drooping branches; forms a broad handsome head.

Cut Leaved Weeping Birch—A most graceful tree of rapid growth, reaching 60 feet; bark white, branches slender and drooping.

Catalpa Bungeii—Not a weeping tree but is grafted on stems 5 to 8 feet from the ground, forming an umbrella shaped top, very ornamental and hardy.

Tea's Weeping Mulberry—Grafted on a straight stem five to six feet from the ground, the branches droop down, forming a tent-like bower of beautiful green leaves, very hardy and ornamental.

Weeping Mountain Ash—Has long, slender branches; and white flowers in May, followed by clusters of bright red berries.

Choice Evergreens

For a good windbreak, or to hide some unsightly spot, nothing can equal our hardy evergreens. By massing a number of kinds on the lawn, or even using a single specimen, a most ornamental effect is produced and these deservedly popular trees are coming into favor again. We have a choice selection of the best varieties.

Koster's Blue Spruce

SPRUCE

Englemanni—Will grow to a large size but can be pruned to almost any shape desired; foliage light blue.

Koster's Blue (Pungens Kosteriana)—Most beautiful dwarf spruce, grows very compact and always makes a fine show.

Norway (Excelsa)—A tall growing tree of imposing appearance, but is one of the best evergreens for a hedge if kept pruned.

ARBORVITAE

American Arborvitae (Occidentalis)—An erect grower but can be trimmed to any desired effect, foliage light green.

George Peabody (Lueta)—A dwarf growing beautiful golden leaved Arborvitae, is showy and fine.

Globosa—Grows a round head naturally, has a dense light green foliage and is of the arborvitae type.

Hovey's Golden—A small growing arborvitae, foliage light green with golden tinge and very compact.

Retinispora (Squarrosa)—The foliage is a light blue, soft and beautifully arranged.

Retinispora (Plumosa)—Makes a neat round head with feathery light green foliage; makes a nice show as a single specimen.

Retinispora (Plumosa Aurea)—This

evergreen is fine for massing as it has a bright golden foliage that holds its color.

Retinispora (Plumosa Argenta)—Foliage light green, dotted with white spots giving it the appearance of snow flakes, neat and showy.

Irish Juniper—Makes an upright growth like a column, foliage deep green and very compact; makes a nice effect in a cemetery.

Savin Juniper—Low and spreading with open top, dark green foliage, can be pruned to different shapes.

Mugho (Dwarf Pine)—Very distinct, foliage light green, does not grow tall, but spreads out assuming a globular form; stays close to the ground.

Ponderosa (Bull Pine)—Grows very rapidly, on this account is good for windbreaks; will grow to 100 feet.

Strobus (White Pine)—A strong growing tree with light green foliage, will grow in poorest soil, hardy and ornamental.

Sylvestris (Scotch Pine)—A rapid grower to 80 feet, long silvery needles, fine appearance, good for screens.

Retinispora Plumosa

Ornamental Flowering Shrubs

Althea (Rose of Sharon)—In double red, double white, double blue and variegated; a hardy shrub, blooms late in the summer, very profuse and handsome.

Calycanthus (Sweet Shrub)—Produces fragrant flowers of chocolate red; the old-fashioned shrub.

Deutzia—A hardy ornamental shrub producing thick wreaths of bloom close to the branches early in the spring. We have the Pride of Rochester.

Flowering Almond—A beautiful pink flower, very double, which usually shows before the leaves appear in the spring. Shrub grows 3 to 4 feet high.

Flowering Currant—Profuse masses of yellow flowers, very early in the spring, quite fragrant.

Forsythia Viridissima (Golden Bell)—Produces yellow flowers very early in the spring. It has erect branches with bright green bark which is attractive.

Golden Elder—Leaves golden yellow, very fancy and ornamental in contrast with other shrubs.

High Bush Cranberry (*Opulus Viburnum*)—A large bush-form shrub with dense green foliage, single white flowers appearing in May followed by clusters of red berries which cling to the branches all winter.

Honeysuckle (Bush Form)—Covered with bright green leaves very early in the spring, followed by small pink flowers.

Hydrangea (Hills of Snow) — Grows into a round bush with large white flowers resembling snowballs in shape. Does not grow as tall as *Hydrangea P. G.*, and makes a neater appearance.

Hydrangea (*P. G.*)—Very hardy and produces profuse masses of huge white balls in August, which later turn pink and remain till winter.

Japan Quince—Blooms very early in the spring; this shrub is covered with scarlet flowers and later by small quince-shaped fruits which are very fragrant.

Kerria Japonica (Jap Rose)—It has bright green leaves and produces dark yellow flowers in June and continues throughout the summer; grows 4 to 5 feet high.

Lilacs—These hardy shrubs produce great masses of fragrant flowers early in the spring and are noted for their beauty. We have four colors, *Rothomagensis* is red. *Villoso* is pink, *Vulgaris* is purple, and *Vulgaris Alba* is white.

Rhus (Sumac)—Tall growing shrubs of great hardiness, noted for their leaves, fruits, and flowers. We have the *Glabra* and *Copallina*, both good varieties, also the *Cotinus* or Smoke Tree, which in midsummer is covered with hairy like flowers which remain until fall and give the appearance of smoke.

Snowballs—A short, bushy shrub that produces pure white flowers in great profusion, which have the appearance of snowballs in shape. We have the common and the Japanese snowballs, both white.

Snowberry (*Symphoricarpos*) — Small growing shrub, very hardy and will grow in dense shade, small flowers appear in June followed by white waxy berries which remain until almost spring.

Spiraea (Anthony Waterer)—A dwarf growing shrub which has profuse quantities of bright crimson flowers in July and August.

Spiraea (Golden)—A shrub with double white flowers, the foliage being a bright yellow in the spring changing to golden brown in the fall.

Spiraea (*Thunbergii*) — Flowers of feathery appearance very early in the spring while its leaves form a dense feathery bush.

Spiraea (*Van Houttei*) — Produces a mass of pure white flowers in June; very showy and one of the finest shrubs. Makes a fine effect as a hedge or as a background for display.

Syringa Garland (Mock Orange) — Noted for its white fragrant flowers which resemble real orange bloom, also forms a neat shrub.

Syringa (Golden)—A small shrub of striking beauty with its bright golden foliage, which remains through the season and when set with other shrubs or in clumps the effect is very pleasing.

Weigelia (*Eva Rathke*)—It is a profuse bloomer; dark crimson, distinct and fine.

Weigelia (*Rosea*)—A medium tall growing vigorous shrub, flowers produced in profuse abundance during June and in smaller amount during later summer, deep pink in color, one of the best flowering shrubs.

Weigelia (*Variegated Leaf*)—Leaves bordered with yellow, very distinct and showy.

Yucca (*Filamentosa*)—Its long sword like leaves remain green throughout the winter and give it a tropical like appearance, and white flowers on long stems come in June.

Spiraea van Houttii

Choice Selection of Roses

Climbing Varieties

Climbing American Beauty—Beautiful pink, like its namesake in the bush form, good bloomer.

Climbing Sunburst—Good grower, rich yellow flowers.

Crimson Rambler—A rank grower, immense bloomer, very hardy, flowers formed in clusters.

Dorothy Perkins—Shell pink, fine foliage lasts till fall, great bloomer.

Dr. Van Fleet—Flowers on long stems. delicate white, finest form.

Flower of Fairfield—The everblooming Crimson Rambler, blooms all summer, extra fine.

Tausendschon (Thousand Beauties)—Great bloomer, rapid grower, almost thornless.

Moss Roses

Crested Moss—Deep pink, well covered with moss.

Salet—Light rose color, late fall bloomer.

Dwarf or "Baby" Roses

Baby Rambler—Pink flowers, always in bloom from early spring till frost, dwarf habit.

Catharine Zeimet—The white baby rambler, great bloomer, completely covered with white.

Mme. Cecile Brunner—Light pink, extra fine in color and shape, great bloomer.

Orleans—Geranium pink with white center, one of the best dwarf roses.

Hybrid Teas and Perpetuals

Betty—Rich golden yellow, flowers very large and fine form, well perfumed.

Etoile de Lyon—Bright yellow, with a bright center, showy and good.

Dorothy Perkins

Frau Karl Druschki—A marvelous pure white without any tinge of any other color, immense in size and very free.

Gen. Jacqueminot—Rich dark red and a great bloomer, the best of the older sort.

Gen. McArthur—A real red rose, fine shape, a grand rose.

George Ahrends—Beautiful pink, fine large size very fragrant and showy.

George Dickson—Dark velvet crimson extremely large and perfect form.

Grus an Teplitz—Bright crimson with fiery red center, always in bloom.

Hermosa—Bright pink, good bush form and always full of attractive roses.

Killarney Pink—Buds long and pointed roses bright pink, exquisite form and fragrance.

Killarney White—Has all the good qualities of the Pink Killarney, but color is as white as snow.

Marshall P. Wilder—Free and full bloomer, flowers large and bright cherry carmine color.

Maman Cochet—Deep rosy pink, large flowers on long straight stems.

Ophelia—Vigorous grower, flowers beautiful salmon pink, large and perfect shape.

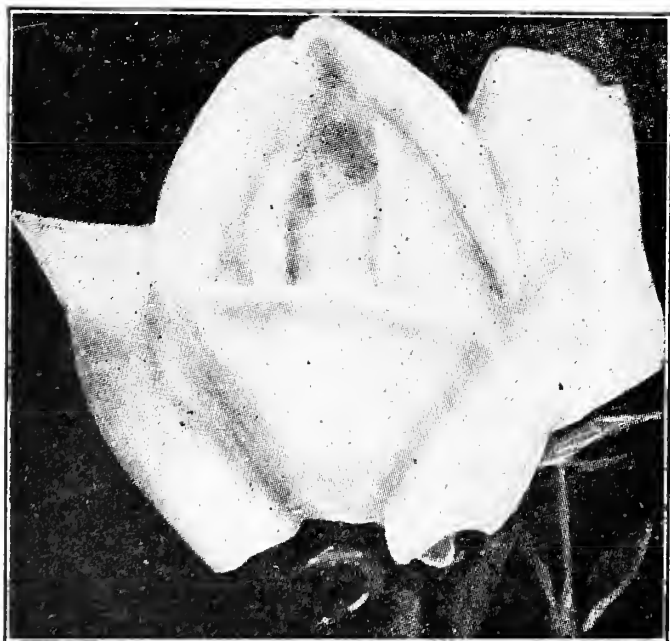

Paul Neyron—Deep rose color, claimed to be the largest rose grown.

Persian Yellow—Deep golden yellow, grows in shrub form, good bloomer.

Sunburst—The deepest golden yellow of all roses, large fragrant, and always shows well.

Los Angeles—A new creation from California and the grandest all round rose ever introduced. Bush is hardy and vigorous, stems long, color represents "the tints of the dawn, the gold of the noon-day, and the blush of the sunset."

Rugosa Alba—Single, white.

Frau Karl Druschki

Except Superba Everbearing.....	\$1.50	per 100, \$10.00	per 1000

Selected Peonies

These most beautiful flowers are easily grown, require little care and when once established will make their presence known every year for almost a life-time. The following varieties we believe are among the best.

Couronne d'Orr—White reflecting yellow, center carmine.

Duchess de Nemours—Large and full, pure white.

Felix Crousse—Brilliant red, ruby center, late.

Festiva Maxima—White very large, on long stems.

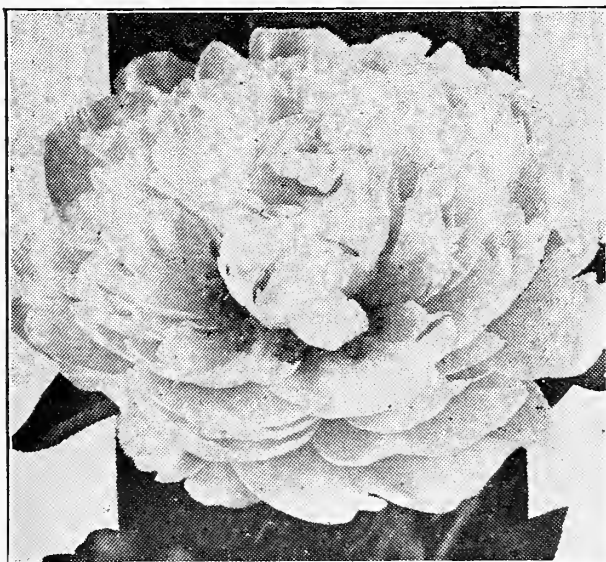

Francois Ortegat—Glistening crimson.

Humei—Late, silvery pink.

Mons. Jules Eli—Beautiful blue pink, large and fine.

Mme. Ducl—Pink, one of the best.

Rubra Superba—Late, dark red, long stems.

Duchess de Nemours

Wisteria (Chinese)—A hardy, rapid climbing vine with pale green leaves; bears flowers in foot-long clusters in May. Color, purple.

CLIMBING VINES

Boston Ivy—Will climb over any surface, without support, clinging to solid walls.

Clematis Coccinea—Bright red, bell-shaped flowers and blooms from June till frost.

Clematis Paniculata—The most vigorous climber and bloomer, being completely covered with small white flowers in September. Very fragrant; will grow anywhere.

Clematis Jackmanni—Dark purple; very large. Forms a perfect mass of the richest blooms.

Dutchman's Pipe—A hardy vine of rapid growth; very large leaves, flowers brownish and resemble a pipe.

Halleana Honeysuckle—A great climber and very beautiful, producing very fragrant flowers of a delicate yellow.

Kudzu Vine—A rapid growing vine with large leaves and dense foliage, said to grow 40 to 50 feet in a single season, produces pea-shaped flowers in August.

Clematis Paniculata

HEDGES

Barberry Thunbergii—A dwarf shrub of neat and graceful form; makes a good hedge; requires little care in trimming and is very hardy.

California Privet—The best for hedge, thrives almost anywhere. It has no thorns, does not sucker from the root and can be trimmed to any desired shape or height.

JAPANESE MAPLES

Japanese Maples—Very dwarf and spreading, having a dense foliage of heavy purple leaves which always attract attention, grows very slowly and should be planted in the most conspicuous spot in the lawn.

TREE HYDRANGEA

The same variety as the bush except that it is trained up like a tree.

HARDY PHLOX

A brilliant annual flower continuing to grow and bloom from middle of June till fall, grows 2 to 3 feet high, thrives best in open sunny spots, easily grown and very hardy. We have four colors, white, pink, red and purple.

ASPARAGUS ROOTS

Palmetto—Very valuable market sort, early, large stocks and free from rust.

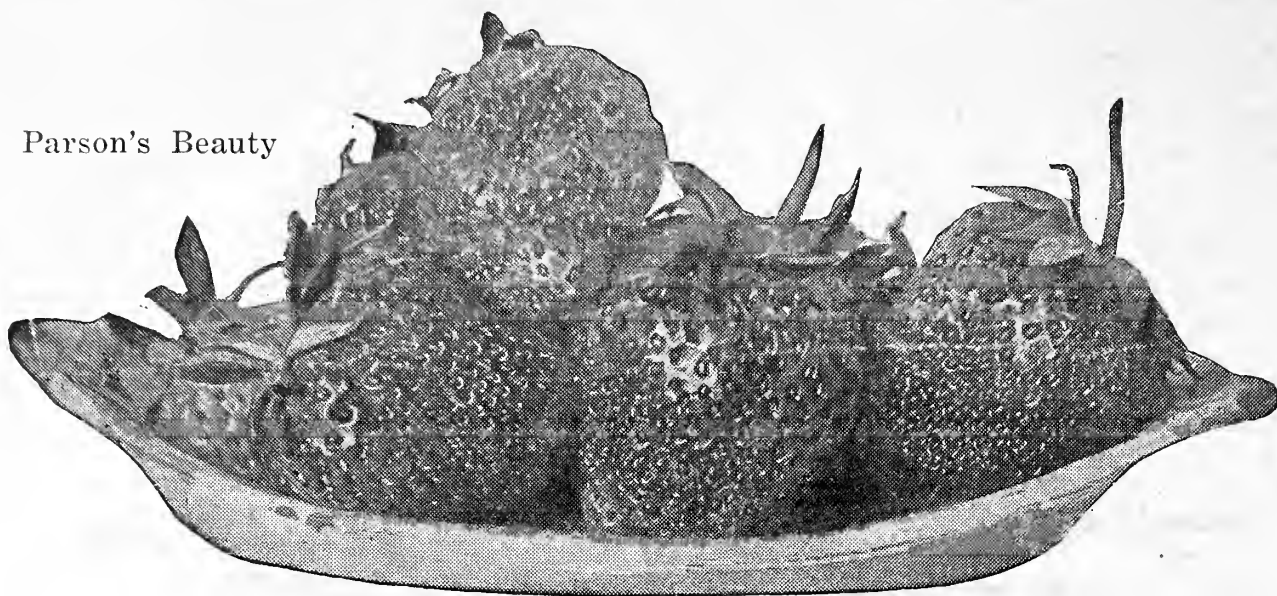

RHUBARB ROOTS

Victoria—Leaf stocks are large, tender and produce early; one of the best.

SAGE

Holts Mammoth—A strong growing plant, perfectly hardy and ornamental, but the leaves of the plant are much used as a flavoring for food.

Parson's Beauty

Nut Trees

Spanish Chestnut—The nuts are very large and find a ready market, tree bears young and is a handsome lawn decoration.

American Sweet Chestnut—A valuable tree both for its nuts and timber; will grow anywhere and is very ornamental. Every farm should have a small chestnut grove.

Black Walnut—A native tree growing to a large size, valuable for its timber, and the rich oily nuts are produced in large quantities.

Japan Walnut (Sieboldi)—Very hardy, rapid grower; bears young and very productive. Resembles the butternut in shape, with smooth and thinner shell.

English Walnut—A fine growing tree with spreading head, producing thin shelled nuts of best quality and always in demand at good prices.

Blackberries

Snyder—Very hardy and productive; a great cropper and the most reliable market sort. Medium early.

Eldorado—Very large and jet black sweet, with no hard core; vine hardy and productive.

Blower—Hardy and productive; very large and good quality; fine color and good shipper.

Raspberries

King (Red)—Very early, firm and good quality, strong grower, large size, hardy and productive.

St. Regis (Red)—An everbearing sort that is well recommended; extremely prolific, berries large, firm and a good shipper. Bears the first season.

Cuthbert (Red)—Very hardy and a good market sort; strong, upright growers, best quality, very productive.

Kansas (Black)—Jet black in color, good size, very hardy and immense cropper.

Cumberland (Black)—The largest of the black caps; good quality, firm and a good shipper. Bush is hardy, a good grower and productive.

Plum Farmer (Black)—Medium early, matures its fruit in a short time, large size, juicy and very hardy, and good bearer.

Winfield (Black)—A new variety, is coming to the front, not only because of the fine size and good quality of the fruit, but the canes seem to be very free from disease, and leaves remaining green and healthy, and stand drouth well.

Mulberries

Downing—Very productive; fruit large ripens all summer; black, sub-acid.

Russian—Vigorous and hardy in growth; good for windbreaks or other protection; fruit not of much value.

New American—Very hardy tree, vigorous grower and a great producer of excellent fruit. Ripens June till Fall.

Strawberries

Varieties marked imperfect will not bear when planted alone, but must have a Perfect bloom planted at least every third row. Varieties marked Perfect will bear when planted alone.

Senator Dunlap (Per)—A rampant runner, producing immense quantities of dark red berries, firm and good flavor; medium size, early.

Sample (Imp)—Berries continue large to the last, colors all over at once; a good producer; one of the most profitable; ripens mid-season.

Haverland (Imp)—Very productive; berries light red in color, very large, resists frost better than others; midseason.

Parson's Beauty (Per)—Good both for home use and market, fruit large, bright red to the center, medium early and well flavored, plants vigorous and strong growers.

Wm. Belt (Per)—Most excellent quality; large size, bright red, good producer and shipper; ripens late.

Superb (Per)—This is an everbearing variety and has proven to be the best one for this purpose. Berries begin to ripen in June and they continue until frost. Dark red and glossy; of good quality; hardy; very productive.
